

UK renewable energy claims

Sedgwick has a global network of engineering experts and specialist loss adjusters to assist the renewable energy insurance risk and claims sectors.

We are the largest claims management and loss adjusting business in the world, with service offerings including:

- Major and complex loss
- Loss adjusting
- Engineering experts
- Risk engineering and surveys
- Forensic investigations
- Forensic accounting
- Third party administration

EXPERIENCE

Our engineering loss adjusters have detailed knowledge of renewable energy claims, with expertise in the fields of electrical, mechanical, civil, structural, materials and marine engineering. Utilising this experience, we understand the design, procurement, construction, commissioning and operation phases within the industry. We are therefore able to advise the insurance market on procurement and implementation matters, including pre-loss risk assessments as well as remedial work activities.

Our expertise includes managing claims arising from installations comprising:

- Wind turbines
- Photovoltaic and solar arrays
- Tidal
- Hydro-electric
- Biomass
- Anaerobic digesters
- Ground and air source heat pumps
- Energy storage systems

Focused on delivering the right level of service by specialism, Sedgwick's renewable energy team delivers the finest technical skills, industry specific knowledge and best practices to respond to all kinds of losses, from simple cases to those of significant size and complexity.

Sedgwick offer full geographic cover across the UK and overseas and we are ready to respond wherever a loss occurs. Clients have direct access to our market leaders who draw on a combination of hands-on industry experience, insurance expertise and an in-depth understanding of the commercial, contractual and financial arrangements prevalent in the renewables industry.

Our service doesn't stop with material damage losses, be it on an operational facility or one that is under construction. We also provide many complementary services to assist with forensic investigations, accounting and liability, along with related adjusting and claims management services.
